- MySQL

AWARDS

2023
Kibo Robot Programming Challange 2023
It was my honor to hold rank 11th in the national round Kibo Robot Programming Challange 2023. We build several apps to move and execute astro-bees in the space.

2023
Nasa Space Apps Challange 2023
It was my honor to hold rank 2nd in the regional round Nasa Space Apps Challange 2023. We worked to solve the wildfire issues. And that was a boom !

CERTIFICATION

2022
ICPC 2022
It was my first ICPC contest. Learned a lot from there !

2022
Bengal AI : Data Annotation
I was so excited learning how the AI works ! I annotated a bunch of data and trained the system. It was a great journey though.

2023
Nasa Space Apps Challange 2023
The first hackathon in my life. It was 36 hour long competetion ! we also become the 2nd runners-up in the regional.

2023
ICPC 2023
This was the second the ICPC in my life. And this journey was amazing.

MY PROJECTS

2022
Game : Bumble-Jet
This was my first game project. I made it using i-Graphics. Our player is in the P51 Mustang Jet fighter. The obstacle will be pillars with spikes in it. Our player have to move vertically between those pillars to save himself and progress in game.

2023
Kibo Spcae Astro-Bee Guiding App
We build apps that leads the astro-bee to go through obstracles and do several works using their sensors, actuator etc. This project required knowlegde about version control, Object Oriented Programming (JAVA).

2023
Game : Arcane Adventure
"Arcane Adventure" is a simple 2D game developed in Java using the libGDX library.Your mission is to navigate your spaceship through galaxies filled with obstacles and reach the goal point to reclaim the treasure.

2023
Android App : Bookhub
It was my project to build a community where people can exchange or sell their books for their own perpose.
